

THE FORKLIFT AND YOU

NOW AVAILABLE ON DVD

OPERATOR TRAINING
PROGRAM FOR THE
LUMBER INDUSTRY
- 2ND EDITION

The Complete *The Forklift and You* package includes:

- Award winning 45-minute video (also available on DVD) filmed in an actual independent dealer's lumberyard. It demonstrates all aspects of forklift operation and shows forklifts from 8 different manufacturers and three-fuel types. It is the only industry-specific video of its kind—and the only one that demonstrates truck mountable forklift operation. This video has won three awards for its technical quality and overall excellence. It has saved our members money through demonstrating proper material handling in addition to safe operation.
- Trainer's Guide walks the company owner/manager and trainer step-by-step through the process of conducting training on-site using your own staff expertise. We even suggest what points to highlight as you discuss each page and section of the Operator's Workbook in conjunction with the video.
- Operator Package includes 5 operator workbooks, exams, ID cards, and certificates of completion.
- A four-color poster helps you remind operators of the training they received, and an Authorized Operator Poster makes it easy for you to track training conducted and comply with OSHA's documentation requirements.

The Spanish Version of *The Forklift and You* package includes:

- 60-minute video in Spanish.
- Complete Operator Package with all of the above in Spanish as well as a Spanish written test answer key and operational examination.
- Trainer's Guide is not available in Spanish.
